

## Snap survey software - Snap 10

Prices are based on a perpetual license fee and are not rental/annual charges.

All products include 12 months free phone, fax and e-mail support, plus software upgrades.

Sep 15, 2009 **Amounts in € and VAT exclusive (21% in Belgium)**

Product	Stand alone	Network	Description
snap Professional + Internet	3,000	6,000	Core product for on-screen questionnaire design, paper, Web or phone surveys. Data collection capabilities plus analysis in the form of tables, charts and statistics. Complete control over final appearance of reports using <b>snap's</b> pre-designed templates for questionnaires and tables, and over 50 formats 2D and 3D chart types, all of which can be modified to achieve a preferred 'in-house' style.
Extra copy	1,500	3,000	Same functions as above. This gives the possibility to an extra concurrent user to use Snap. This of course has nothing to do with the respondent filling out a questionnaire (who is only using a browser, not Snap itself).
snap scanning add-on module	4,000	not available	OCR/OMR add-on software module to enable 'scanned' data entry of completed questionnaires designed in <b>snap</b> . Handles tick boxes and numbers and captures text for coding or data entry. Requires to be installed with Professional on the PC connected to the scanner.
snap Off-line Interviewer add-on module	2,200	2,200	Add-on software providing a portable fieldwork solution using PDA, portable, tablet or kiosk-PC. Collected data is stored ready to be e-mailed or ported back to <b>snap</b> for instant analysis. Initial 5 user pack.
	1,500	1,500	Second and subsequent 5-user packs.
snap Network Interviewing add-on module	2,200	2,200	On-screen design of surveys for distribution to interviewing workstations to complete the surveys. Add quota controls and set rotation of questions and codes.
snap Keystation	500	500	<b>snap</b> keystation enables more than one person to enter data at the same time. A cost-effective way of reducing data entry time or allowing colleagues at remote locations to enter data.
snap Results	750	750	<b>snap</b> Results enables to do analyses and reporting without the Professional module. A cost-effective way of creating analyses and reports on an extra PC.

**Note** : the Network version is to be installed on your server. You can then install a Snap-icom on multiple client PC's and run Snap on each of them, but only 1 concurrent. If you require more concurrent users, you need to order more copies (ask us about volume discounts)

Products do not include any hardware (such as PC, PDA or scanner hardware)

### Training

- at the customer's location, @ 350 € per 1/2 day
- typically 2 half days, working on a concrete customer's survey project, group of max. 4 persons
- at the end of the training, the survey will therefore nearly be completed
